# COUNTY HEALTH DEPARTMENTS

A basic function of county government, a county health department develops, implements and administers programs and services that are aimed at maintaining a healthy community.

- 68 county health departments
- 2 independent city-county health departments\*
- 7 counties without county health departments
- Local County Boards of Health
- Medical Directors

\*Oklahoma and Tulsa Counties operate city-county health departments independent from the OSDH health network.

## Health on the Horizon Oklahoma County

Health is not simply the absence of disease. Health is comprised of our physical, mental, and social well-being, and is influenced by a variety of factors called "determinants of health."<sup>1</sup> These determinants include a range of personal, social, economic, and environmental factors, such as our genetics, behaviors, and access to health care. The determinants of health are inter-related; change in one area results in changes in other areas. As such, interventions and policies that target more than one determinant will have greater impact on our health.<sup>2</sup>

Oklahoma has historically ranked poorly in many key health indicators. Most of these indicators relate to conditions that Oklahomans live with every day, such as poverty and limited access to primary care. Such conditions, along with risk behaviors like smoking and physical inactivity, contribute to the poor health status of Oklahomans.

Recently, Oklahoma has experienced improvement in some key areas, such as infant health (lower rates of pre-term births and infant deaths) and smoking (lower prevalence of adult smokers). The Oklahoma Health Improvement Plan (OHIP) encourages Oklahomans to work together across multiple health care systems to strengthen resources and infrastructure, enabling sustainable improvements in health status.<sup>3</sup> Health is on the horizon, and together we will create a State of Health.

Unemployment rate, 2012 annual average <sup>14</sup>	27.9%	23.3%	18.2%								
	5.1%	5.2%	8.1%								

### Top 10 Leading Causes of Death

The top 10 leading causes of death table on the next page displays a brief picture of the causes of death in Oklahoma County.<sup>15</sup> Since many health-related causes are unique to specific ages, this table provides causes of death by age group as a closer look at the causes of death that are present across almost every age group have been highlighted.

In Oklahoma County, heart disease is still the leading cause of

death for all ages combined. The rate declined 17.7% since the previous 5-year period, from 232.3 deaths per 100,000 population (2003-2007) to 213.1 deaths per 100,000 population (2008-2012). In 2010, the most recent year for which hospital discharge data are publicly available, the total charges attributable to heart disease in Oklahoma County were \$474.16 million, or \$18,992.48 per discharge.<sup>16</sup>

- Provides epidemiologic, statistical, and evaluation support to all program areas
- Coordinates and ensures a competent analytical staff among CFHS program areas through trainings and technical assistance
- Provides technical support on database development and management
- Develops State of the County's Health and other reports

# Community and Family Health Services

# Record Evaluation and Support

Director: Mike Ewald

- Develop and provide on-site training for county health departments
- Provide software support to county health departments
- Ensures client records are organized and maintained
- Provides guidance to the agency for the Health Insurance Portability and Accountability Act (HIPAA)
